

Extending Equipment Life

Extending Equipment Life

All equipment requires repair or rebuilding eventually – no matter how well it is designed or maintained. It might also need to be upgraded to the latest specifications. That's where PRO Services® comes in. When your pump, blower, compressor, or any rotating or reciprocating equipment does need service or after-sales support, you can turn to PRO Services Centers with complete confidence.

No other service company can match PRO Services total customer care. PRO Services also helps customers develop effective maintenance and asset management programs to lower maintenance costs, improve uptime and reduce inventory costs. Our highly experienced PRO Services team provides:

- Quality service alternatives (repair, rebuild, or re-engineer)
- Equipment maintenance (on or off site)
- Equipment upgrades for mechanical, material, and performance improvements
- Upgrading your older style API process pumps to today's high performance standard of the latest API edition
- Hydraulic re-rates to run equipment at its designed operating point
- Scheduled maintenance and plant shutdowns (parts, manpower, and complete turn key support)
- Rationalize parts inventory and develop reduction options
- Management of maintenance at customer's site

PRO Services provides a totally integrated solution to industry through its network of service centers, bringing a total commitment to quality, service, repair, and parts to its customers worldwide.

PRO Repair Capabilities

Our local PRO Services Centers are equipped and trained to perform all of your industrial repairs. Our ISO 9001 Certified PRO Services Centers have the experience and expertise not only to repair your equipment but offer upgrades, resulting in extended run times and reduced costs to our customers. Our goal at PRO Services is to reduce the cost of ownership, improve reliability, and increase profitability for our customers - "Extend Equipment Life."

Individuals charged with the important responsibility of keeping the plant up and the process running efficiently benefit from PRO Services Repair. PRO Repair technicians repair ALL brands of pumps and rotating equipment:

- Vacuum pumps
- Mixers
- Centrifuges
- Turbines
- Babbitted Bearings
- Blowers
- Agitators
- Gear Boxes
- Compressors
- Fans

...reducing your cost of ownership and extending equipment life. No need to source different product specialists depending on the equipment needing repair. One call, one face, one invoice.

ITT Plant Performance Services (PPS)

ITT PPS is committed to utilizing our knowledge services to enhance the profitability and sustainability of our customers' businesses. This is accomplished by lowering equipment Life Cycle Cost through reliability, energy, and maintenance improvements that support plant optimization and increase productivity. These services are based upon ITT's unrivaled service and application knowledge and pump system expertise. You'll gain access to the deepest bench of resources and breadth of expertise that exist anywhere in the world.

ITT PPS can typically return savings of up to 25% annually. Depending on your situation, significant savings accrue by realizing some of the following:

- Longer equipment life
- Lower maintenance costs
- Lower energy costs
- Improved technical support
- Increased equipment efficiency
- Improved quality of repairs
- Reduced turnaround time
- Reduced parts / inventory costs
- Better trained in-house staff
- Improved safety

ITT PPS can be deployed as stand-alone or integrated solutions. Reduce your total cost of pump ownership with ITT.
