

Track your Equipment the *SMART* way.

# i-ALERT<sup>®</sup>2

 **Bluetooth<sup>®</sup>** SMART *Equipment Health Monitor*

## ACTIVITY TRACKER

Track the duration of your run time, workouts and other activities.

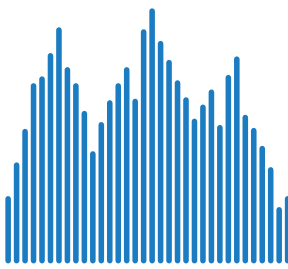

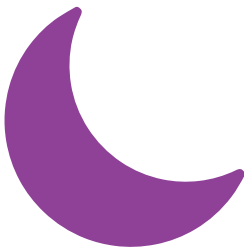

## RUN TIME TRACKER

Track the number of hours your equipment has been operating and schedule maintenance.

## TRACKING SLEEP

Monitor your sleep through the night and set an alarm

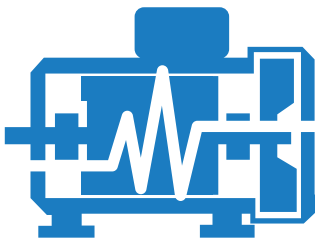

## TRACKING VIBRATION

Monitoring your vibration around the clock and set alarms.

## HEART HEALTH

Monitoring heart rate to determine any problems during daily activities.

## MACHINE HEALTH

Monitor FFT and waveform to determine any problems during daily operations.

About the size of a fitness tracker, the i-ALERT<sup>®</sup>2 Equipment Health Monitor is a Bluetooth Smart-enabled equipment health monitor that allows customers to identify potential problems before the machines become costly failures. It tracks vibration, temperature and run-time hours and wirelessly syncs the data with a smartphone or tablet through the i-ALERT2 mobile app.
