

ITT

Plant Performance Services

Workshop Objectives:

- Learn to apply “Lean Tools and Concepts” to improve reliability and maintenance
- Achieve “Maintenance Excellence” through application of key lean concepts and change management techniques

What’s Included:

- Expert facilitators with 30+ years’ experience in pump reliability and lean
- Real examples demonstrating application of lean in reliability and maintenance
- Exercises that apply lean concepts to reliability maintenance
- Interactive methodologies
- Networking Opportunities
- Lunch time roundtable discussion with trainers

Linking Lean with Reliability Training – One Day

Who Should Attend?

This one-day course is designed for individuals interested in applying “Lean Tools and Concepts” to improve reliability and increase the effectiveness of reliability professionals and the maintenance organization within their plant. It is recommended for Plant Managers, Operations/Maintenance Managers, Reliability Managers, Engineering Managers, Quality Managers, HR Managers and Training Managers or anyone wanting to apply “Lean” to improve maintenance and reliability within their facility.

What you will learn:

In this interactive workshop, participants learn to link lean with reliability, applying key lean concepts and change management techniques to improve the effectiveness and efficiency of reliability and maintenance within their plant. Topics include:

- Linking Lean with Reliability Overview
- Optimizing Maintenance Strategies and Execution with Waste Elimination
- Increasing Maintenance Effectiveness with 5S
- Value Stream Mapping for Maintenance Improvements
- Lean Maintenance and Reliability Exercise – Part I
- Enhancing Maintenance Practices Using Six Key Lean Concepts
- Continuous Improvement with Kaizen
- Achieving “Maintenance Excellence” Using Change Management
- Lean Maintenance and Reliability Exercise – Part II
