- Equipped with state-of-the-art equipment.
- Upgrades that enhance performance and service life.
- Rapid turnaround. Repairs are performed quickly and professionally.
- ISO-9002 Certified procedures and processes.

Superior Methods Of Repair

We utilize leading technology and repair practices. We will not only repair your equipment, but also **increase the average life of your compressor cylinder.**

The following repair methods are available:

- Machine oversize or reline to standard bore.
- Upgraded materials available for longer life.
- Honed cylinders for superior performance.
- Pressure tested to ensure cylinder integrity.
- Perform modifications for monitoring devices.
- Modification of clearances to enhance performance.

Total Quality

Before and after the gearbox has been reconditioned, it is quality inspected for:

- Condition of valve seating surfaces.
- Condition of heads and seating surfaces.
- Cracks and fatigue.
- Cooling jacket condition and blockage.
- Overall clearances to specifications.

Compressor cylinders to be repaired.

Cylinder being bored to accept new liner.
