ITT Industries

Paper Processing Equipment Repair and Re-engineering

Single Sourcing

ITT PRO Services™ is your one source for repair and re-engineering of ALL paper processing equipment, regardless of original manufacturing. We have been in the paper business with our Goulds and A-C brands for over 150 years.

Economical Alternative

Need an economical alternative to high cost replacement parts? Our PRO Services™ Centers are experienced with reconditioning paper processing equipment and restoring it to original specifications. We will upgrade materials to extend service life. Economical PRO Services™ reduces the need for expensive replacement parts inventory and provides the latest upgrades in engineering technology.

Experience Counts

Years of experience allow PRO Services™ Centers to easily handle any paper processing equipment including pumps, mixers, pulpers, feeders, knotters, fans and compressors.

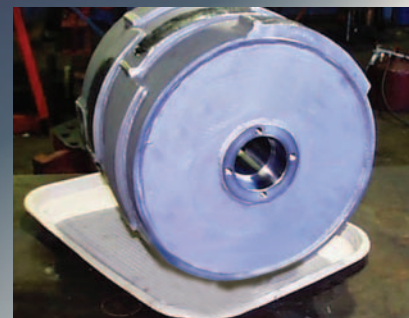

- ISO Certified Facilities backed by the technological expertise and financial strength of ITT Industries.
- Quality repairs and re-engineering insure maximum reliability and extended service life from your equipment.

Pulpers and Extraction Plates

We weld-up and hard face pulper vanes and hard face the wiper bands on extraction plates for extended service life. We balance pulpers and return the worn parts to new and better condition.

Pulper Impeller for use in Recycle Area, "High Wear"

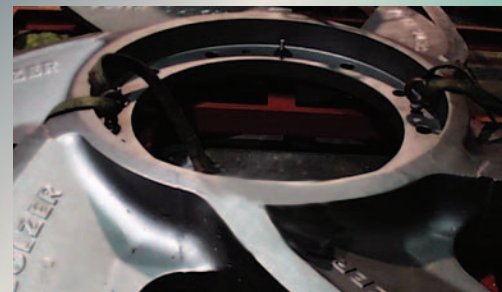

Screen Rotor for Pulpmill Use

- One-year warranty on all rebuilds/repairs.
- Upgrade old designs to latest technology and metallurgies to maximize reliability.
- Reduced storeroom parts inventories. Let PRO Services™ take care of your parts and re-builds.
- Reduce purchase order transaction cost with the elimination of orders for numerous vendors. One order for all our equipment repair and replacement parts.
- Eliminate costly, time-consuming record-keeping activities. PRO Services™ will maintain accurate job file histories for each piece of equipment.

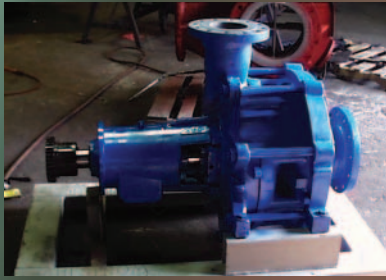

Extraction Plate 400 Series SS Fab or Cast New

BEFORE
