

Professional Gearbox Repair

Name-brand gearbox rebuilt and ready for testing.

Our local PRO Services[®] Centers are equipped and trained to restore all name-brand gearboxes to as-new condition. Our ISO-9002 Certified PRO Services[®] Centers have developed procedures and processes superior to standard repair, resulting in extended service time and reduced maintenance costs to our customers. Our goal at PRO Services[®] is to reduce cost of ownership, improve reliability, and increase profitability for our customers.

ITT

Gearbox Repair Services

Located worldwide, our PRO Services® Centers are able to provide unparalleled gearbox rebuilds and service. Capabilities include:

- Experienced engineering and production staff
- Equipped with state-of-the-art equipment
- Upgrades that enhance performance and service life
- Rapid turnaround. Repairs are performed quickly and professionally
- ISO-9002 Certified procedures and processes

Superior Methods of Repair

We utilize leading technology and repair practices. We will not only repair your equipment but also **increase the average life of your gearboxes.**

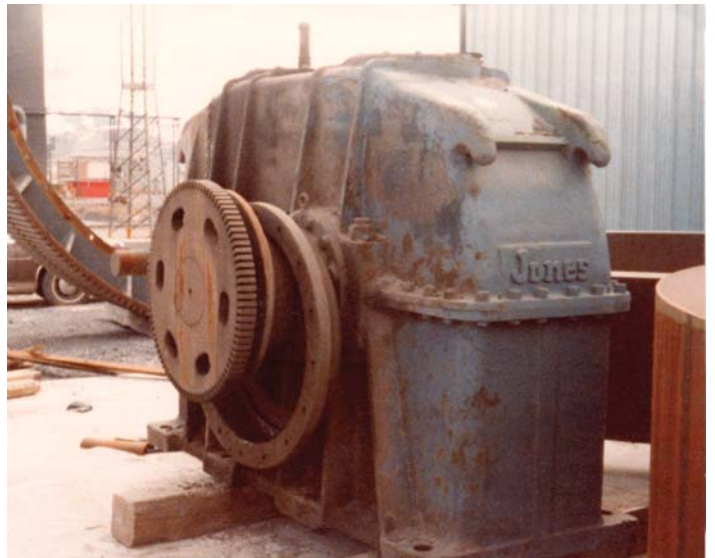

The following repair methods are available:

- Metal spray or sleeving of worn shafts
- Re-sleeving of worn bearing fits to specifications
- Test run capability
- Vibration, temperature and leak testing
- Dynamic balancing of gears and shafts as applicable
- Any style and kind of replacement gears available

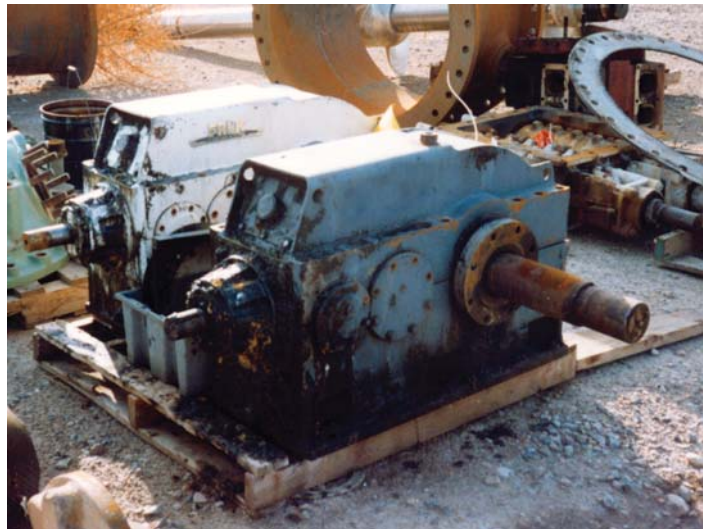

Total Quality

Before and after the gearbox has been reconditioned, it is quality inspected for:

- Proper clearances on shafts and bearing fits
- Proper gear contact
- Proper clearances between gears
- Acceptable vibration and temperature
- Gear wear and fatigue

Ready for tear down and inspection.

To be rebuilt during customer outage.

PRO Services® Advantages
